THREE NEW TENNIS COURTS
TO BE BUILT AT UM

MISSOULA--

The University of Montana, Missoula, soon should be able to accommodate more tennis players as construction of three new courts enters the planning stages.

In addition, there should be better tennis for all, when the present tennis courts are resurfaced within the next few weeks.

J.A. Parker, UM Physical Plant director, said the Missoula firm of Mitschke and Sullivan has been selected to plan the proposed new tennis courts.

Parker said cost of the three new courts will total \$24,500 and the resurfacing project will cost about \$9,000. He said the financing is a joint effort, with \$15,000 of the total cost of both projects coming from student funds and the balance obtained from private sources through the University Foundation.

Planners visited the proposed sites recently to gather the basic information for their drawings, Parker said. If plans go smoothly, he added, construction of the courts should be open for bids within the next 60 to 90 days and completion will depend mainly on weather conditions.

A Denver, Colo., firm which is to resurface the six existent tennis courts on the Missoula campus is expected to arrive in Missoula during the week of Aug. 3 for the resurfacing project, Parker said. Once started, the resurfacing should take very little time, he said.
